## Heroes and Heroines CIC Photography and Video Policy

At Heroes and Heroines CIC, we recognise that photography and video are an important part of the Live Action Roleplaying (LARP) experience. Many participants enjoy capturing the moments and sharing them on social media to celebrate their experiences with the community. We fully support this practice, as it adds to the enjoyment and sense of community within our events.

However, we also understand that not everyone may wish to have their image shared publicly. If you do not wish for images and video of yourself appear on others' social media, we kindly ask that you communicate this clearly to fellow participants on or before the event. This helps to ensure that your preferences are respected by everyone involved.

We also ask that anyone taking photographs or video at our events check with the individuals in the photos and video before posting them on social media. This small step goes a long way in respecting the privacy and wishes of others, ensuring that everyone can enjoy the event comfortably.

As a Community Interest Company, Heroes and Heroines CIC is committed to respecting your privacy and autonomy. We will not use any images or video of or produced by participants from our events on our public social media platforms, in advertising, on our website, or in submissions to our funders without prior consent. Should we wish to use a specific photograph or video, we will contact you directly to seek your permission, providing details of the image and where it will be used.

Thank you for helping us create a respectful and enjoyable environment for all participants.
